Profile

As a passionate and driven individual, I possess skills in modern, performant, and maintainable code development. I have experience in developing and maintaining code for in-house and client websites, utilizing HTML, CSS, JavaScript, React, and Netlify. I excel in communicating with small teams of engineers, designers, and clients daily. My enthusiasm for learning and willingness to take on new challenges make me a valuable addition to any team.

- React Development
- netlify, Figma
- ,Api integration, redux

Education

Alpha Vidhya Sankul, 10th

06/2019 – 03/2020 | mendarda, India

Projects

Travel Advisor

An impressive website for any kind of travel agency. I designed this website with React, Tailwind CSS, and Firebase, which allows users to search for travel destinations and book tickets. I utilized Figma for designing and Netlify for deployment.

Real Estate app

A convincing website for a real estate agent, designed using React, Bootstrap, and Firebase. The website enables users to search for properties based on their requirements and schedule a site visit. The integration of PI allows users to make secure payments.

Yag-design

An impressive web portfolio for constructor builders. I developed this website using HTML, CSS, and JavaScript, with Netlify for deployment. The website showcases the constructor's previous work and services.

Interests

- Reading books
- Videography
- Playing an musical instrument

Thank you for considering my application. I am confident that my skills and enthusiasm for learning make me a valuable addition to your team.
